the cambro® story

When William and Argyle Campbell first opened the doors at Cambro Manufacturing in 1951 their goal was to make a hospital meal tray of the highest quality possible. Named the Camtray®, it demonstrated that they were as committed to excellence in the food service industry as they were to the quality of their own products. As 2011 marked the company's 60th year of leadership in quality, innovation and customer service, today Cambro serves the world with the industry's most complete selection of products for widely diverse segments of the food service business.

Since 1951, the company has experienced many changes including a greatly expanded product line, new methods of manufacturing and distribution, and an increased emphasis on issues like environmental responsibility. From a single factory in California, Cambro has grown to become an international presence with production facilities and sales offices in the United States, Europe, the Middle East and Asia. But the original guiding vision of the Campbell brothers remains unchanged: to create and provide the most innovative, durable and highest quality products for the food service industry. Now led by William's son Argyle, Cambro is still dedicated to meeting our customers' needs, and equally committed to helping you serve, satisfy and delight your guests.

At the heart of our business philosophy is our willingness to listen, so in a very real way we owe all our success to you, our customer. Our longevity in a very competitive field for 60 years certainly proves the value of that philosophy, and we are proud to have earned the loyalty of customers of all sizes and in all segments of the industry. From hotels to healthcare to caterers, from restaurant chains to educational facilities, we understand the food service business and we design and create our products with the end user foremost in mind. Our goal is to provide our customers the best possible value on products that are durable, save labor and increase food safety, so you can offer your guests a superior experience while enhancing profitability.

Cambro is uniquely committed to investing in the people and processes that make our products a reality. We're proud that children and grandchildren of some of our first employees are with us today, and of the dedication to quality and service of our entire family worldwide. We continually work on developing new ideas for specific industry segments, and invest in new tooling and leading-edge machinery to bring these products to market. We persistently strive to improve our manufacturing methods to be more efficient in terms of process and materials, to keep costs under control while keeping our planet healthy. And we constantly seek to maintain quality and value despite rising costs of transport and raw materials, the need to reduce environmental impacts, and the demand of end users for total order accuracy and responsive service across a global market.

From once offering a single product, the Camtray, sixty years ago, today Cambro offers a wide range of trays, table service and display items, storage, shelving, merchandising and insulated transport products, as well as innovative warewashing systems and healthcare meal delivery solutions.

The future is certain to bring great changes to our industry. Yet one thing that will remain a constant is Cambro's tradition of continually developing new products that help food service operators save time and money, increase sales, reduce labor and improve service. In the years ahead, guided by the commitment of its founders to innovation, quality, and value, Cambro Manufacturing will still be the leader in serving the food service industry and you, our valued customer.

Camrack® 4-in-1 Warewashing System

The Camrack System will protect glassware and keep it clean until the next event, eliminating the need for rewashing.

Efficient Washing

Open inside compartments provide thorough circulation of water and cleaning solutions and promote quick and thorough drying.

Long-lasting polypropylene Camracks are built to withstand chemicals and high temperatures up to 200˚F (93˚C).

Sanitary Storage

Closed outer walls keep fingers and contaminants out and reduce risk of breakage and injury. The Camrack cover and Camdolly make this system completely enclosed. Glassware stays clean when in storage, so operators will only have to wash items once.

Inventory Control

A variety in base rack colors help identify at a glance both contents and quantity per rack. Available in 10 colors.

Safe, Sanitary Transportation

Camracks can be transported across large campuses or to off-site locations in one single unit.

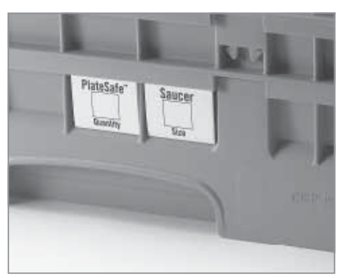

Easy to grip handles and smooth overlapping sides facilitate safe handling.

Camrack Cover Seals from the Top and Camdolly® Seals from the Bottom

Camracks interstack with racks from major manufacturers.

Content labeling options include one-color custom hot stamping or pre-printed clips that are added at factory during assembly.

StoreSafe HACCP NSF

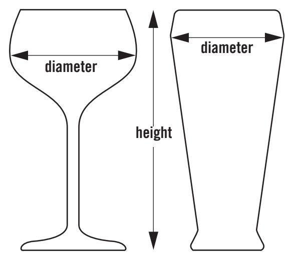

Camracks are covered by one or more of the following patents: Full Base Dish Rack D 412,607. Half Base Dish Rack D 404,176. Half Dish Rack Extender D 400,321. Enlarged Dish Rack Extender D 399,614. Dish Rack with Extender 5,934,486 Utility Patent. Pronged Base Dish Rack D 403,472.

Full Size Camracks® for Stemware & Tumblers

These racks offer complete protection for all your delicate and valuable stemware and tumblers, from washing and handling to stacking, storing and transporting.

Choose the correct dishrack:

1. Measure the maximum diameter of your glass (stemware or tumbler) to determine the number of compartments.
2. Measure the maximum height of your glass (stemware or tumbler) to the top edge of the rim to determine the compartment height.

Components

Camshelving® is a modular system that allows the flexibility to assemble shelving to fit any size area. The key components, including posts, post connectors, traverses and shelf plates, are available in a variety of sizes. They can be easily configured to custom build shelving to maximize storage space. Unique design elements such as shared posts and corner connectors simplify assembly and increase storage capacity.

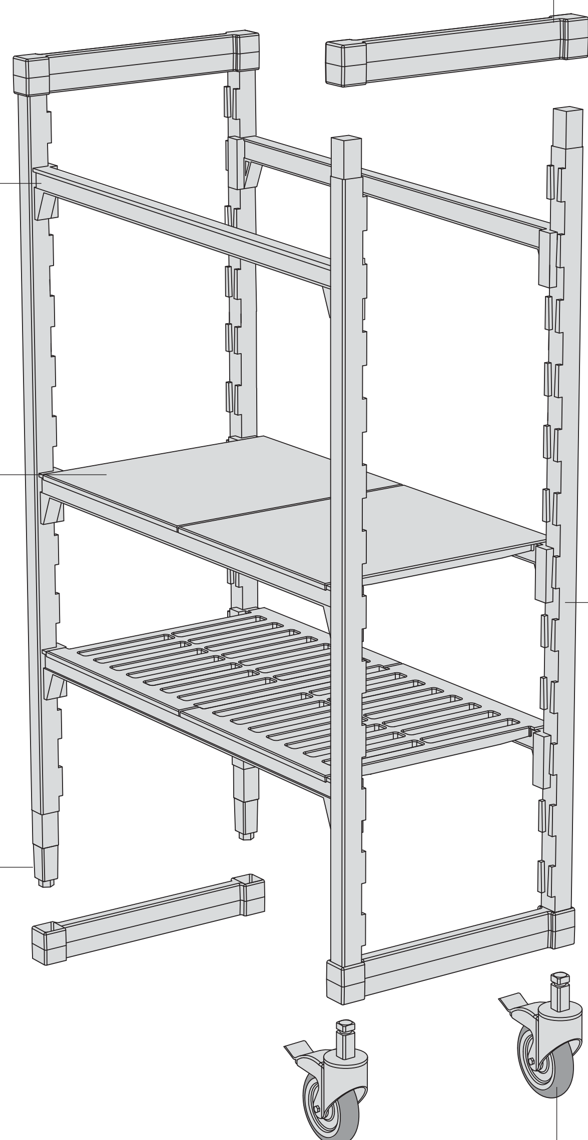

Traverses

Traverses have a steel core with a polypropylene exterior to provide strength and durability.

Traverses connect to the post by sliding on to the dovetail on the post.

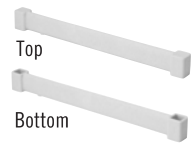

Two traverses are needed to build one shelf, and they define the length of the unit.

Post Connectors

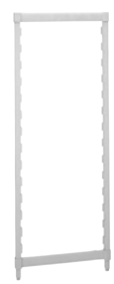

Post connectors hold two posts together and define the width of the unit.

They are made of polypropylene and provide excellent cross stabilization.

- The traverses on both the first and second unit share the middle post.
- No add-on clips or S-hooks required.
- There is no loss of weight bearing capacity when built in a straight line.

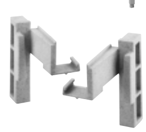

Corner Units & U-Shape Units

- Corner connectors can be used to build corner units and U Shape units.
- Traverses snap onto corner connectors just like they snap onto the dovetails of the posts.

Corner Connector Set

- Attaches a basic unit to a second unit at a 90˚ angle or to form a U-shape.
- A set of corner connectors are needed for each shelf.

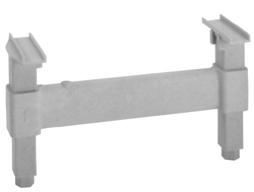

* Corner connectors are recommended for use on traverses equal to or shorter than 48" (1220 mm), and covered by U.S. Patent D498,664S.

Dunnage Stand

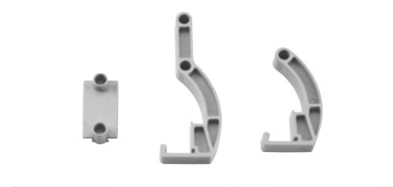

- Increases weight bearing capacity to 1000 lbs. (454 kg) on the bottom shelf.
- Recommended for units 54" (1380 mm) or longer.

* Dunnage stands are covered by U.S. Patent US 6,981,454B2.

Fence System

- Prevents stored items from falling off shelving units.
- Ideal for mobile shelving.

Mobile Units

Camshelving® Configuration Details

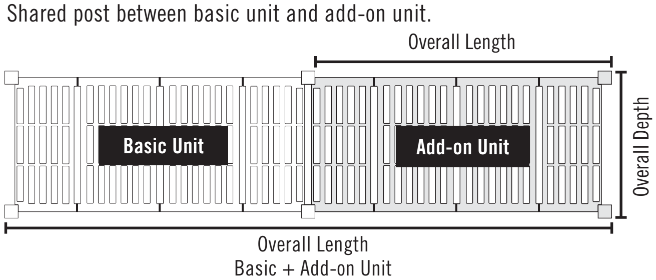

- The following charts are provided to assist in developing a footprint for your storage area.
- They can also be used to help determine your actual shelf space.
- Traverse measurements are based on outside, or overall unit length.
- This includes the posts.
- The overall length varies slightly when using a basic unit, add-on unit, intermediate unit or corner unit.
- These variations are outlined below.

- Resistant to scratching, peeling, warping and corrosion, every component in Camshelving Basics was rigorously tested for strength, reliability and performance.

EXCEPTIONAL VALUE

Shelf plates can be placed in an open end Camrack® OETR314 and washed in a commercial dishwasher.

- Material easily wipes clean and shelf plates are dishwasher safe thus improving labor efficiency.

Camwear® Polycarbonate Food Pans

Store, transport and serve all in one pan. Camwear food pans are made from durable polycarbonate that will not crack, bend or dent. Precisely designed to Gastronorm GN specifications, with a large radius bottom to reduce food waste. At half the cost of stainless steel, Camwear pans keep contents as cold as metal pans with less condensation. Pans stack neatly without wedging or sticking.

Colors: Clear (135), White (148), Black (110). Except 18CW and 28CW available in Clear (135) only.

Camwear pans are not recommended for steam table or microwave use. See H-Pan™ section for these high heat applications.

Colander Pan is covered by U.S. Patent D 528,376.

Virtually unbreakable Camwear polycarbonate withstands temperatures from -40˚F to 210˚F (-40˚C to 99˚C).

Uniform ½" (1,27 cm) flange ensures a smooth fit in prep tables and food bars.

Molded-in graduations in standard & metric for easy inventory management.

Won't react with food; minimizes potentially hazardous chemical or acidic reaction.

Non-stick smooth interior surface increases yields and promotes easy cleaning.

Textured bottoms resist scratching.

Cold Test

Tests prove Camwear food pans keep products as cold as stainless steel. Stainless may feel colder, but as these test results demonstrate, Camwear food pans keep products just as cold for just as long.
